

In the Claims

Please replace the claims as originally submitted with those identified below,
respectively:

A1 1. A method for preventing hepatotoxin induced liver damage in mammals, said method comprising the steps of:

administering, to a patient, at least two ounces of a formulation comprising processed
Morinda citrifolia.

2. The method of claim 1, wherein said *Morinda citrifolia* is administered in dosages comprising at least two ounces of processed *Morinda citrifolia* juice twice daily on an empty stomach for a period of at least two months.

3. The method of claim 1, wherein said *Morinda citrifolia* is in juice form.

4. The method of claim 1, wherein said *Morinda citrifolia* is in solid form.

5. The method of claim 1, wherein said *Morinda citrifolia* is in powder form.

6. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* present in an amount between about 0.1 and 80 percent by weight.

7. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 0.1 and 5 percent by weight, said formulation being administered for a period of at least seven days.

8. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 5 and 10 percent by weight, said formulation being administered for a period of at least seven days.

9. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 10 and 15 percent by weight, said formulation being administered for a period of at least seven days.

10. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 15 and 20 percent by weight, said formulation being administered for a period of at least seven days.

11. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 20 and 25 percent by weight, said formulation being administered for a period of at least seven days.

12. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 25 and 30 percent by weight, said formulation being administered for a period of at least seven days.

13. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 30 and 35 percent by weight, said formulation being administered for a period of at least seven days.

14. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 35 and 40 percent by weight, said formulation being administered for a period of at least seven days.

15. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 40 and 45 percent by weight, said formulation being administered for a period of at least seven days.

16. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 45 and 50 percent by weight, said formulation being administered for a period of at least seven days.

17. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 50 and 55 percent by weight, said formulation being administered for a period of at least seven days.

18. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 55 and 60 percent by weight, said formulation being administered for a

period of at least seven days.

19. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 60 and 65 percent by weight, said formulation being administered for a period of at least seven days.

20. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 65 and 70 percent by weight, said formulation being administered for a period of at least seven days.

21. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 70 and 75 percent by weight, said formulation being administered for a period of at least seven days.

22. The method of claim 1, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 75 and 80 percent by weight, said formulation being administered for a period of at least seven days.

23. The method of claim 1, wherein said hepatotoxin is carbon tetrachloride (CCl₄).

24. A method of inhibiting further hepatotoxin induced liver damage in mammals, said method comprising the steps of:

administering, to a patient, at least two ounces of a formulation comprising processed *Morinda citrifolia* twice daily.

25. The method of claim 24, wherein said formulation comprises ten percent said *Morinda citrifolia*, said formulation being administered for a period of at least seven days.

26. The method of claim 24, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 0.1 and 80 percent by weight, said formulation being administered for a period of at least seven days.

27. A method for preventing cancerous growth, in the liver of mammals, at the initiation stages of carcinogenesis by blockage of carcinogen-DNA adduct formation, said method comprising the steps of:

administering, to a patient, at least two ounces of a formulation comprising processed *Morinda citrifolia* twice daily.

28. The method of claim 27, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 0.1 and 80 percent by weight, said formulation being administered for a period of at least seven days.

29. A method for blocking carcinogen-DNA adduct formation during early stage carcinogenesis, said method comprising the steps of:

administering, to a patient, at least two ounces of a formulation comprising processed
Morinda citrifolia twice daily.

30. The method of claim 29, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 0.1 and 80 percent by weight, said formulation being administered for a period of at least seven days.

31. A method for inhibiting, preventing, and destroying hepatic carcinogens, said method comprising the steps of:

MB17

administering, to a patient, at least two ounces of a formulation comprising processed
Morinda citrifolia twice daily.

32. The method of claim 31, wherein said formulation comprises said *Morinda citrifolia* in an amount between about 0.1 and 80 percent by weight, said formulation being administered for a period of at least seven days.
